

Red Filter Wand

Cut out this inner circle.

Green Filter Wand

Cut out this inner circle.

Copy onto cardstock. Cut out all six "filter wands". Cut out inner circles of all and tape colored filter onto the inside of the wand with the color name. Glue a Popsicle stick along the inside of the handle, if needed. Glue a plain wand on top, sandwiching the filter in between. Shine a high intensity flashlight through each filter onto a white background. Combine the red, green and blue projected colors in different combinations to make red, blue, green, yellow, cyan, and magenta. Combine all 3 to make white.
